What is the Ivy Point Difference?

Ivy Point is an active adult living option which is rare, with only a few such options in the entire city. We have strived to build an active age-restricted community located close to where people currently live, work or in close proximity to family. Ivy Point provides residents true independence at a price that is affordable. At all Ivy Point Communities, we provide the services you want, without the cost of services you don’t want or need. Ivy Point active adult residents can enjoy cooking at home or going out to a restaurant, as we do not provide or charge for food service. Most of our residents still drive so specialized transportation is not needed. Ivy Point residents are independent, so they do not require extra medical care.

Other facilities that offer these added services start in the thousands per month and escalate from there. These accommodations should only be sought if assistance is truly needed.

At Ivy Point Communities you only pay for what you need.
